DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 18-20 drawn to a mask, classified in class 430, subclass 5.
- II. Claims 12-17 and 24, drawn to a semiconductor device, classified in class 257.
- III. Claims 21-23, drawn to a method of forming a circuitry feature, classified in class 430, subclass 311.

The inventions are distinct, each from the other because:

Inventions I and II, III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the mask could be used to make a materially different product such as a semiconductor device that does not use the second mask to modify the pattern formed by use of the first mask.

Inventions III and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process could be use to make a materially different product such a device wherein the second mask is not used to form an overlapping pattern but is used to form a separate exposure pattern.

Art Unit: 1756

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
